Datum — data centre facilities on Cody Technology Park

Cody Technology Park is a secure, high-spec innovation hub in Farnborough. The park offers a campus environment with on-site amenities, strong transport links and a long-established technology heritage, and is designed to support businesses with advanced operational, security and infrastructure needs.

Datum Datacentres operates FRN1, a Tier 3+ enterprise-grade colocation data centre on the Cody Park campus, with FRN2 currently under construction next door. For businesses looking to house IT infrastructure securely and professionally, FRN1 offers a purpose-built alternative to accommodating servers in an office or investing heavily in a dedicated server room.

What is colocation?

Colocation — or 'colo' — simply means housing your business servers and IT equipment in a professionally managed data centre, rather than keeping them in your office.

You own the kit; **we provide the space, power, cooling, security and connectivity to keep it running reliably, around the clock.** Think of it as moving your IT out of the office and into a purpose-built environment designed to protect it.

Why host your IT with us on Cody Technology Park?

➤ A straightforward, low-commitment way to take IT out of the office and into a properly managed facility:

- **Located on a secure technology campus.** Your IT is hosted within a specialist business environment with 24/7 on-site security, controlled access, perimeter fencing and CCTV.
- **No costly server room builds.** Avoid the capital expense and complications of constructing and maintaining dedicated on-site server room.
- **Better than any office environment.** Dedicated cooling, resilient power, and physical security that a standard office simply cannot replicate.
- **Always on.** Our 100% uptime SLA means your systems keep running - even when things go wrong elsewhere.
- **Purpose-built security.** FRN1 holds PASF (Police-Assured Secure Facilities) accreditation and multi-level access control — far beyond what most on premise facilities can offer.
- **Easy to visit, when needed.** Close to the M3, Farnborough Main station and Farnborough Airport, with Heathrow and Gatwick also easily accessible.

➤ **On-site connectivity.** FRN1 is carrier-neutral, meaning you can access a range of connectivity providers directly through the data centre:

Solutions to suit every business – from a partial rack to a full IT suite

Not every business needs an entire rack. Our **DatumFoundation** packages are designed to give smaller deployments a professional, cost-effective home, with room to grow.

Quick specification

	1/4 rack DatumFoundation	1/2 rack DatumFoundation	Full rack DatumFoundation
• Usable space	9U	20U	41-52U
• Included power/cooling	1kW	2kW	3kW
• Included IP transit (dedicated, diverse)	100Mbps	100Mbps	100Mbps
• 2N power provision	A+B PDUs as standard for all configurations Fed from A+B 32Amp feeds		
• 100% power SLA	✓	✓	✓
• 2x free cross connects	✓	✓	✓

 Datum Edge Pod/Foundation Terms and Conditions apply.

-  **Quarter-rack and half-rack options:** ideal if you have a small amount of infrastructure but want all the benefits of a professional data centre environment.
-  **Easily scalable:** flexible contracts make it easy to flex up as your needs evolve, without costly moves or disruptions.
-  **Need something more bespoke?** We also provide solutions for businesses with more complex or growing requirements, including caged areas (adding physical separation and control within the data centre) and fully customised IT suites (maximum control within a dedicated environment completely tailored to your specifications).

Our Cody Park data centres

FRN1 / Tier III+

- **22,000ft²** technical space
- **1,200** racks across four data halls
- **2N UPS** full power redundancy
